Korean (currently learning)

UI Developer with a track record of delivering responsive, accessible, and high-performing websites. Skilled in HTML, CSS, JavaScript, React, and Adobe Creative Suite, I create intuitive interfaces that boost engagement, conversions, and performance. Experienced in mobile optimisation, accessibility, and SEO. I collaborate with developers, marketing and sales teams to align digital solutions with business goals. Driven by creativity and curiosity, I continuously explore new ways to enhance user experiences and connect with audiences.

Current Employment

Web Designer

ALLTHETOPBANANAS GROUP   JUL 2022 - PRESENT

Key Achievements & Responsibilities

- Designed and implemented responsive websites, improving mobile usability and driving a 70% increase in mobile engagement.
- Optimised website performance and accessibility, reducing page load times by 1 second and ensuring 100% accessibility.
- Developed reusable HTML, CSS, JavaScript, SCSS, jQuery and React components, cutting new page development time by 25%.
- Enhance website visuals, graphics, and UI elements, boosting user engagement with core site features.

- Website Management: WordPress development, content updates, site optimisation.
- Collaboration: Worked with sales, marketing teams to deliver business-aligned solutions.

Courses

Front-End Developer Course

THE LEARNING PEOPLE   JAN 2021 - MAY 2022

EllChan_Anime
Built a responsive web portfolio using HTML, CSS, and Bootstrap to showcase original artwork. Created an interactive, mobile-friendly gallery with optimised images and descriptions, implemented a validated contact form with third-party email integration, and managed version control and deployment via GitHub.

Ranger Game
Developed a choice-based space adventure game using JavaScript, HTML, CSS, and Bootstrap. Used DOM manipulation and object-driven logic to dynamically update visuals, narrative, and player choices, with gameplay systems for health, ammo, and fuel leading to multiple branching endings. Enhanced engagement with CSS animations and JavaScript-controlled audio.

E-commerce Product Page
Developed an e-commerce product page using JavaScript, HTML, and SCSS. Built a responsive image carousel and desktop product modal with thumbnail navigation, and implemented shopping cart functionality with real-time user feedback via toast notifications.
